

# Empowering Students to Solve Real-World Problems

This project inspires students to tackle real-life challenges in their school and community through creativity, collaboration, and hands-on learning.

Created for students and teachers working together across European countries, it brings ideas, cultures, and classrooms together in one shared initiative.

**Let's turn curiosity into action and make a meaningful impact together.**

 by Vlatka Antolić

# Project Aims

Our project is designed to equip students with essential skills and foster a collaborative spirit. The key aims are:

1

**Recognize real-life problems in their school and community**

2

**Develop critical thinking and problem-solving skills**

3

**Collaborate with peers from other European countries**

4

**Propose realistic and creative solutions**

5

**Improve communication and digital competence**

6

**Become active, responsible citizens**

# Key Competences Developed

Our project is designed to equip students with a comprehensive set of key competences, fostering their holistic development and preparing them for future challenges:

**Critical thinking & problem solving**

**Communication in foreign languages**

**Learning to learn**

**Digital competence**

**Creativity and teamwork**

**Social & civic competence**

# Project Themes

Students can choose to work on projects related to the following real-world challenges:

**Excessive screen time**

**Stress and school pressure**

**Lack of physical activity**

**Environmental issues**

**Peer relationships & bullying**

**Low motivation for learning**

# Your Journey Starts Here

By combining the right aims, competences, and real-world themes, this project gives students and teachers a shared path to explore meaningful challenges, build practical skills, and create positive change together.

**Get involved, collaborate, and turn ideas into impact.** The next step begins with your commitment to learn, lead, and make a difference.
